Stunt *Double*

Let the double *take the hit.*

Every AI agent action, rehearsed on a copy of your business first.

AI agents don't just answer now. *They act.*

33%

of enterprise software will have AI agents by 2028.

They refund, email, edit databases and delete servers.

When they're wrong, *it's real.*

July 2025 — An AI agent deleted a company's production database, during a code freeze.

2026 — Another deleted a database and its backups, in nine seconds.

So every agent gets *a double.*

1

Rehearse

on a copy of your business

2

Measure

what really changed

3

Approve

the consequences, not code

Nothing real happens until a person says yes.

The blast radius is *zero.*

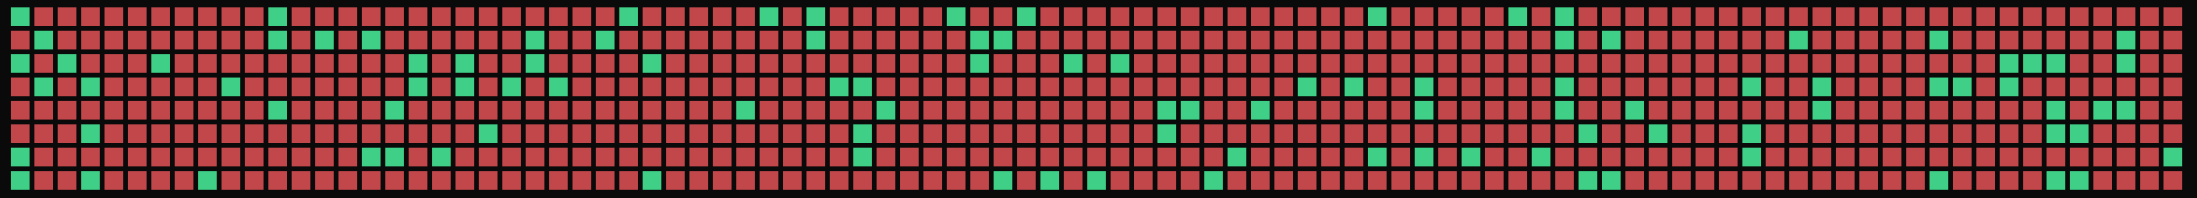

0

customers left on the double

1,300

customers in production, untouched

744 refunds planned. *104 were right.* It kept exactly those.

$5,136

kept: the right 104

$32,268

cut: 640 people never double-charged

Everything a careful team needs.

- Plain-English approval
- Two-person approval
- Rehearsed undo
- AI jury of three labs
- Every catch becomes a rule
- Signed evidence

Measured live, *not on slides.*

12/12	8/8	8/8	63→41
bad plans stopped	good plans approved	unseen wrong plans stopped	on a school it never saw

Zero false alarms. 201 automated tests.

Built on *Vultr.*

Cloud Compute

Every rehearsal in two fresh gVisor sandboxes.

Serverless Inference

Four labs' models write, check and judge.

Vultr API

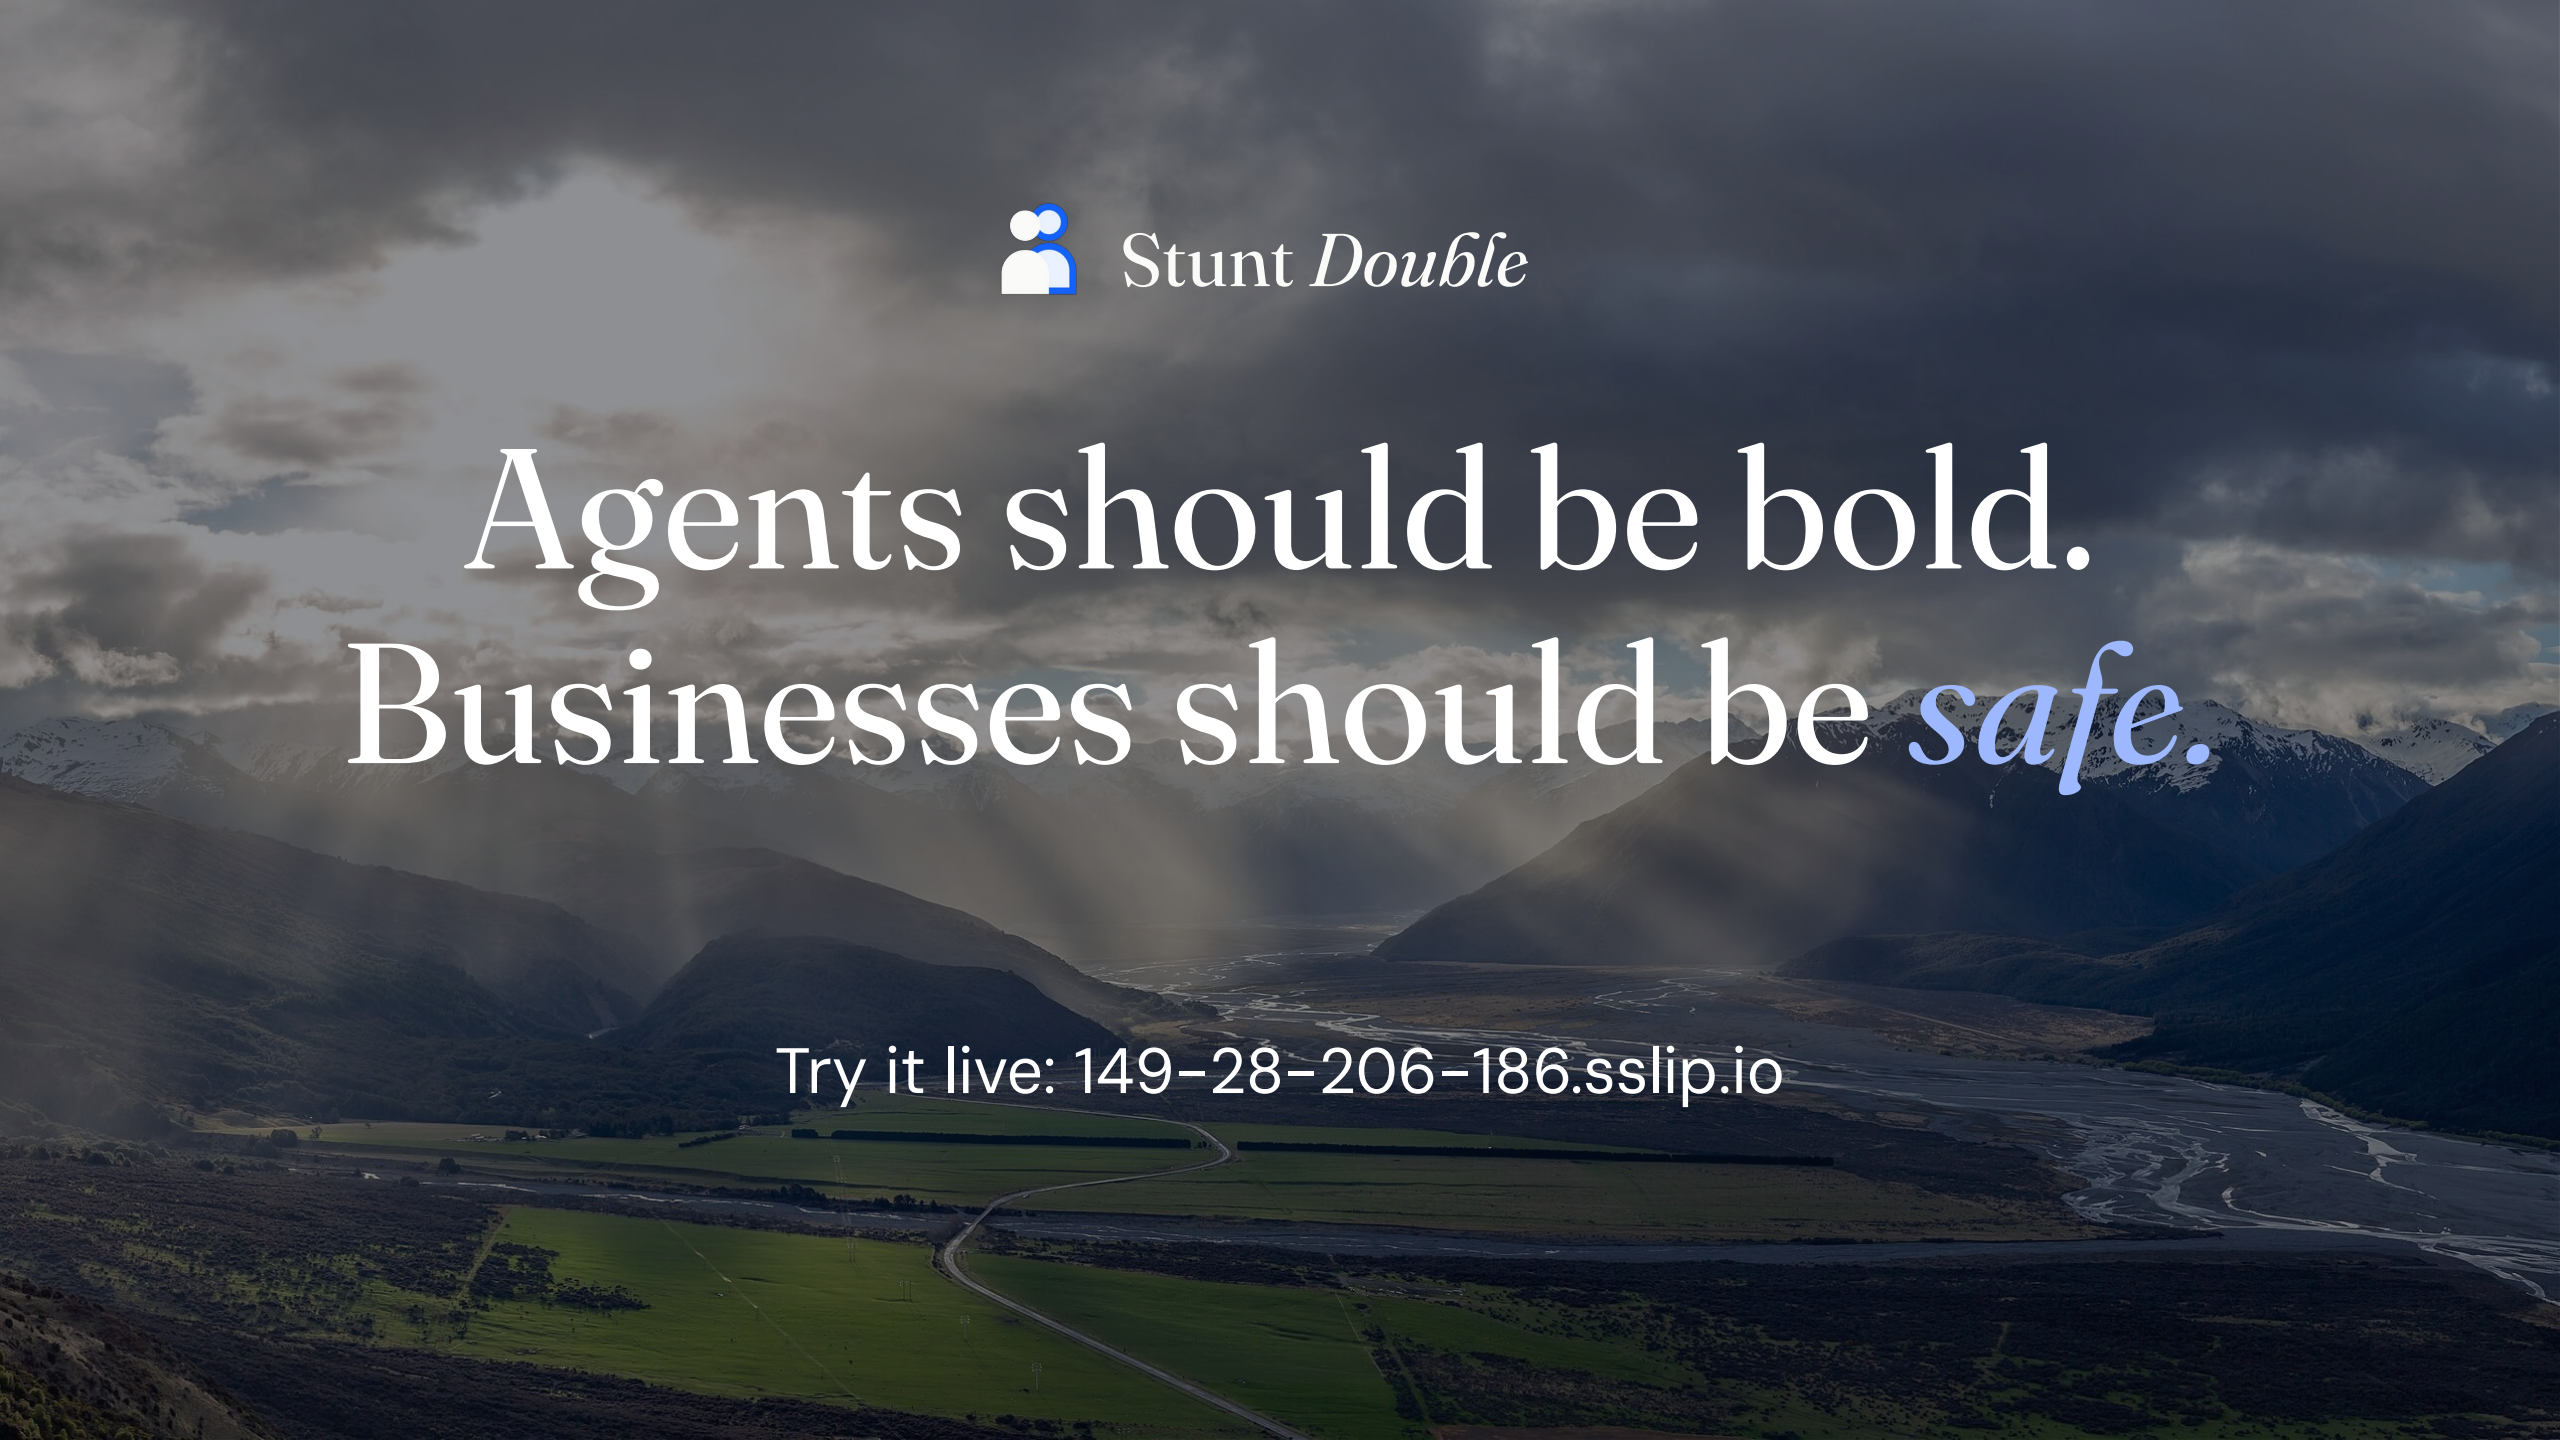

A safe double of your real server fleet.

$8.64 the whole build, every test included

One caught mistake pays for a seat for *55 years.*

$32,268	$49	73%
one mistake, caught	a seat, per month	gross margin

For the teams who sign off on what AI agents do.

Stunt Double
Agents should be bold.
Businesses should be safe.
